

Chat after sending a DM

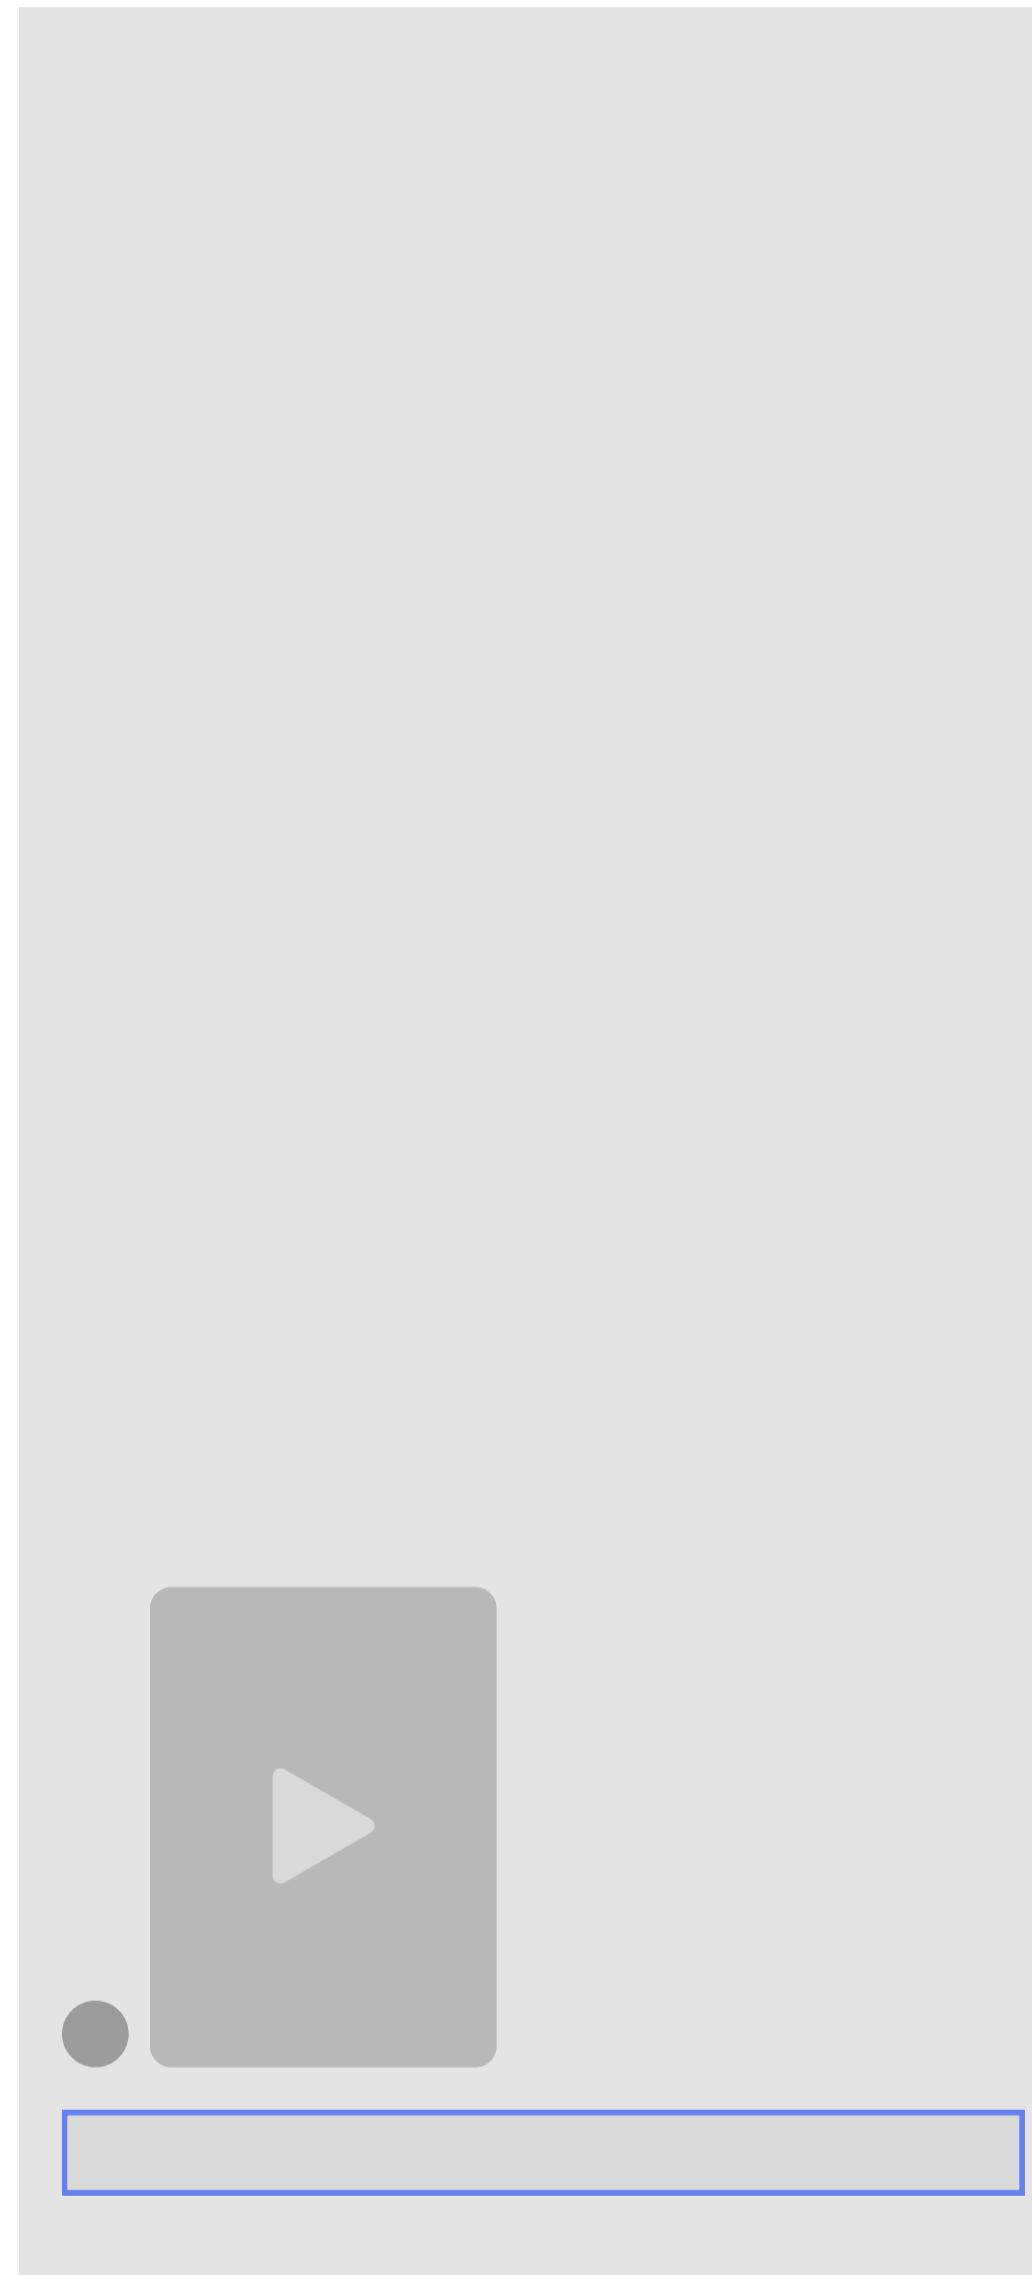

User sending out reels

Chat:

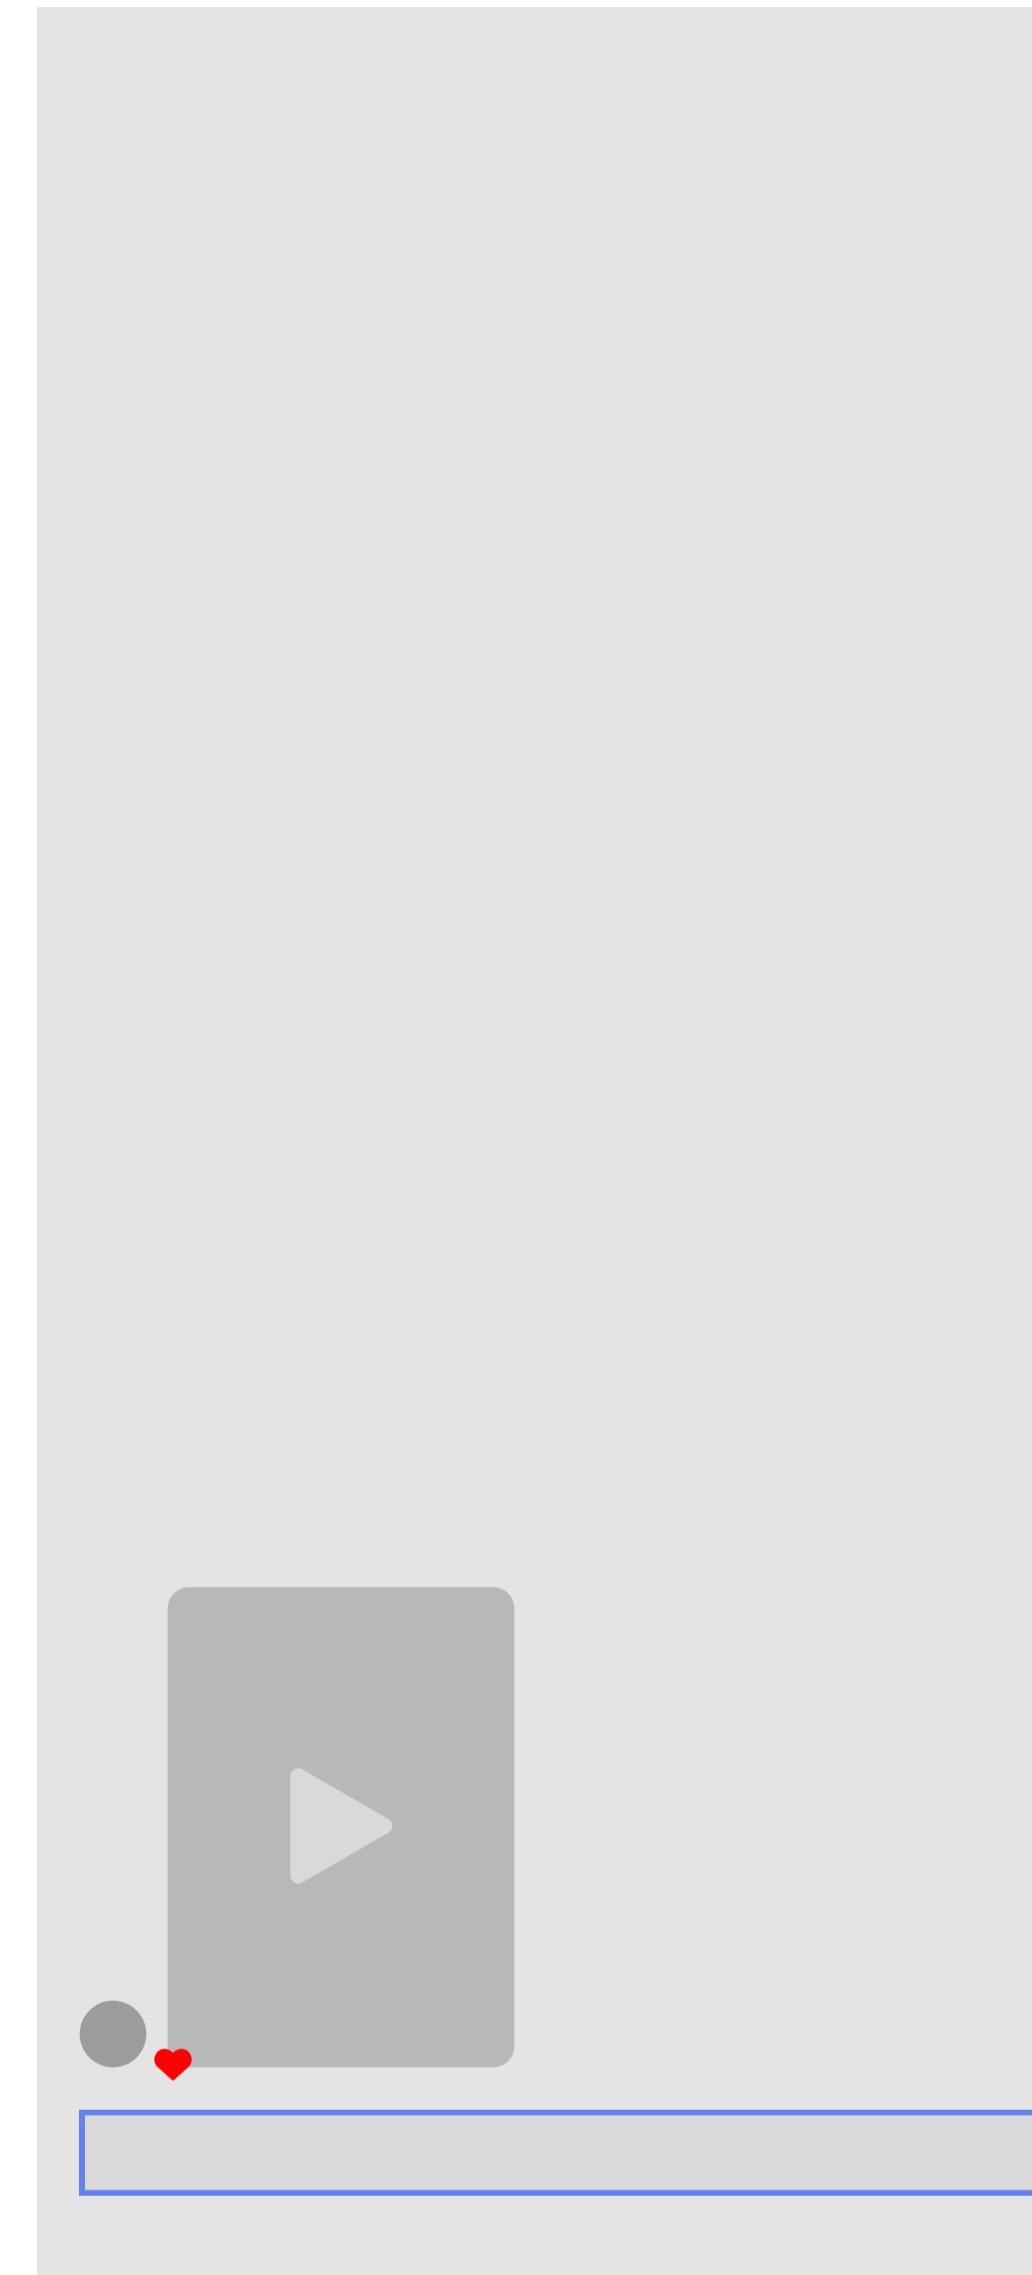

- New UI Visual Indicators:
- "Unseen icon indicates that the video has not been sent to the user yet but is in the queue"
 - Progress bar: this shows that there has been 3 reels sent and one has been seen second video has been delivered and 3rd is still in the queue.
 - Clearing the queue: this will allow the user to quickly clear the reels they sent if needed

User receiving the reels

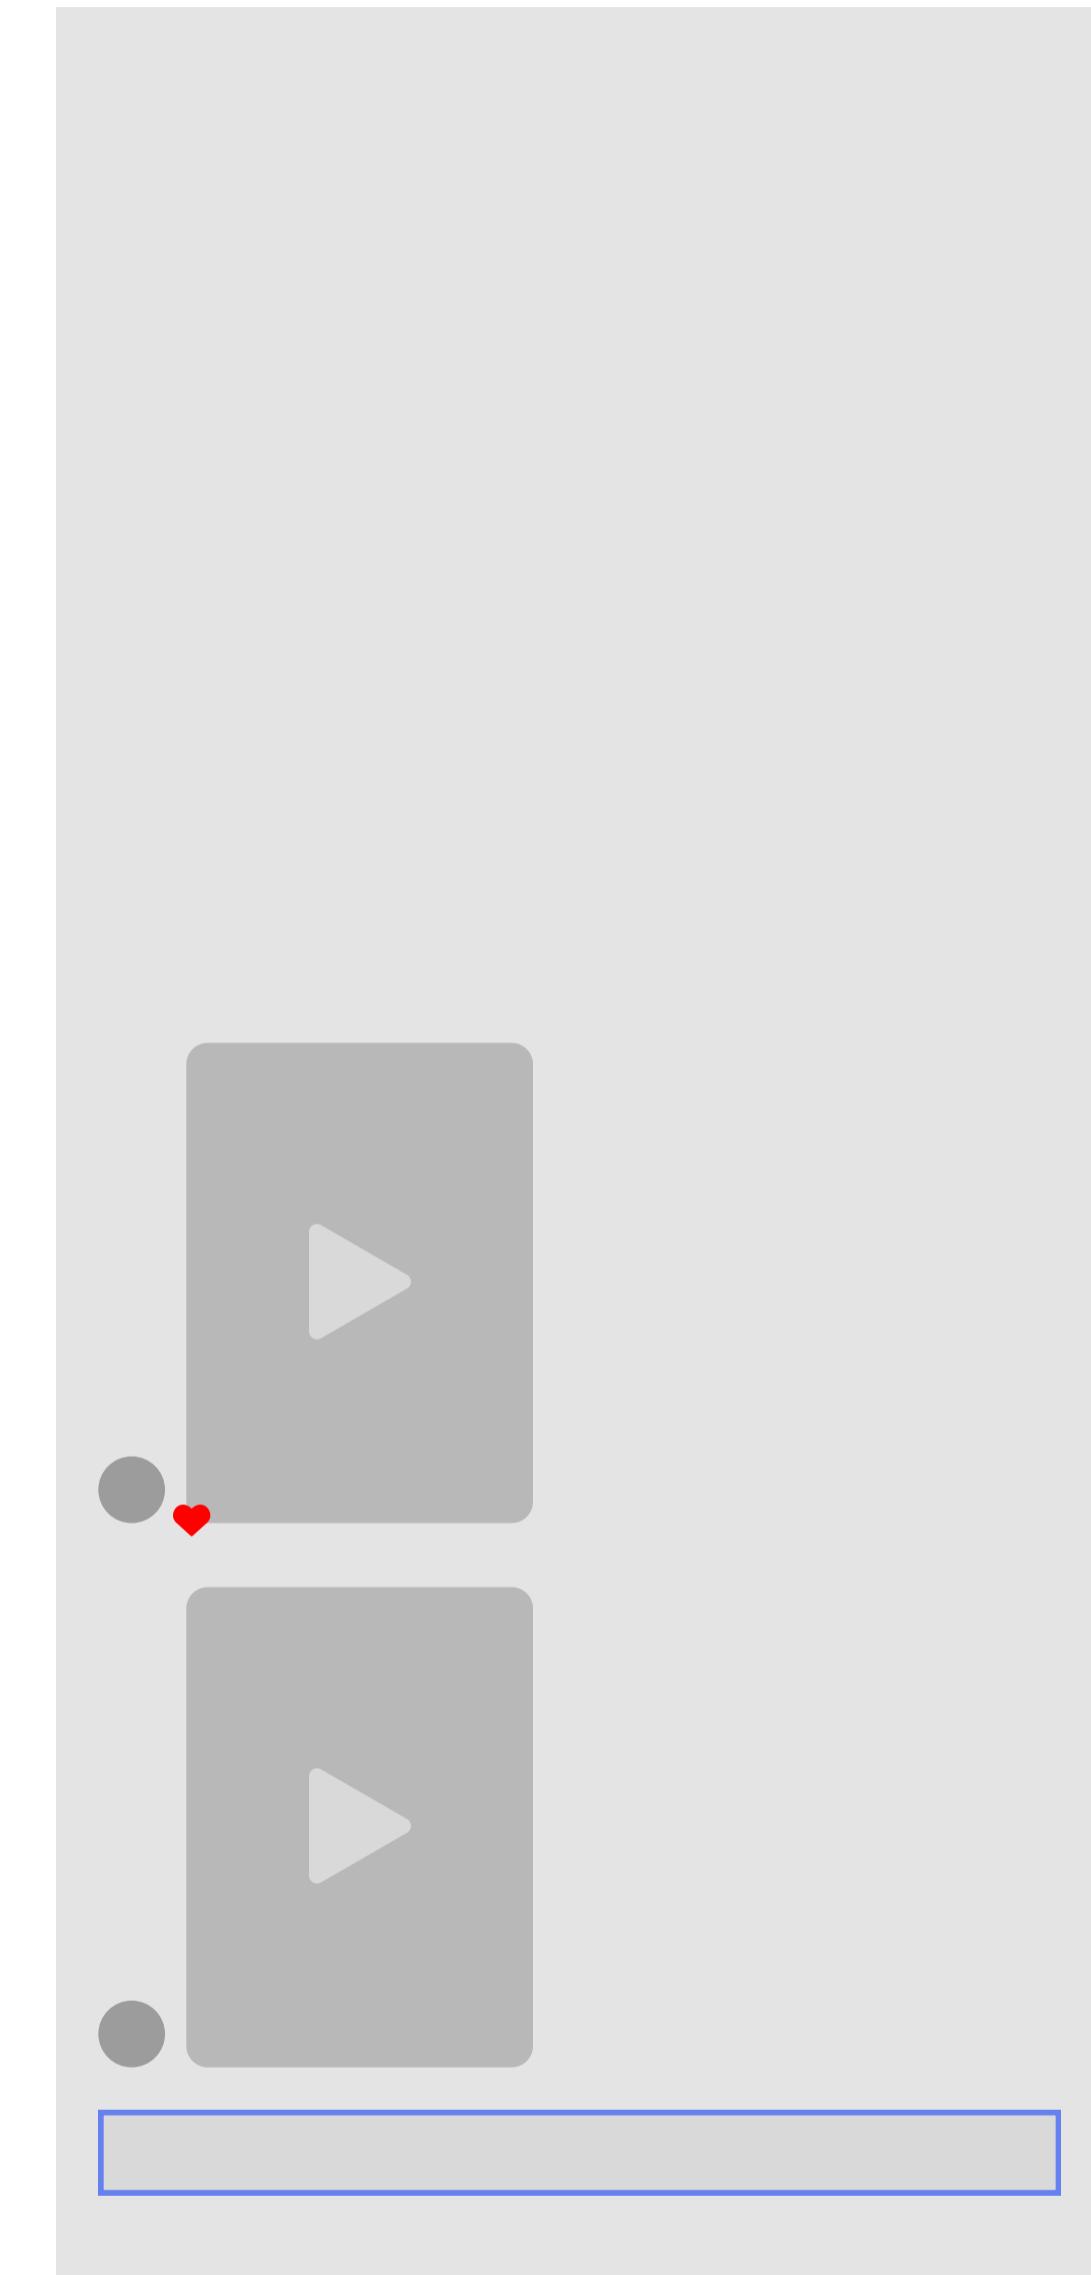

Chat:

- So in the backend there are 3 videos in the queue but we are not giving any additional information to the user so we don't overwhelm them
- Once they watch the first reel and interact within the chat than the next reel will appear

Now that the user seen the reel and interacted in the chat the next reel will be sent

Next reel in the queue appears
